

example 113: "open wire" cable steering system for a single rudder boat. The pedestal is integrated in the deck by the hull maker. The steering unit is the BS25 bulkhead steerer with Ø25 mm steering shaft. The steering cable is guided to the quadrant via two flat sheaves and two articulated sheaves. Rudder stops have to be made in the hull to limit the rudder travel to 2x36°.

BS25 bulkhead steerer
